

# Nutrition Software

**Q.** Can you name the only nutrition software that can save you 20, 40, 80 or more hours a week in recording and analyzing food intakes?

**A.** **NutriBase IV**. And it's as easy as 1, 2, 3...

**Click and Burn.** Start NutriBase and click a button to burn a CD for your clients to take home with them.

**Install and Record.** Your clients install the NutriBase Intake Module software and record their own food intake (for any number of days).

**Click and Send.** Your clients click a button to email their food recall to you. (Or copy to a floppy, if preferred.) Your analysis takes only seconds... **Next!**

Cut your workload significantly by having your clients record their own intakes. Make your services more affordable *and* more profitable. Reuse the CD's. Use your own custom labels. This feature makes us unique, but there's much more to us than this. Come visit us...

**GET THE FACTS... BUY INFORMED... DON'T BE SORRY!**
